Lighting Step by Step Checklist.

Our Mission

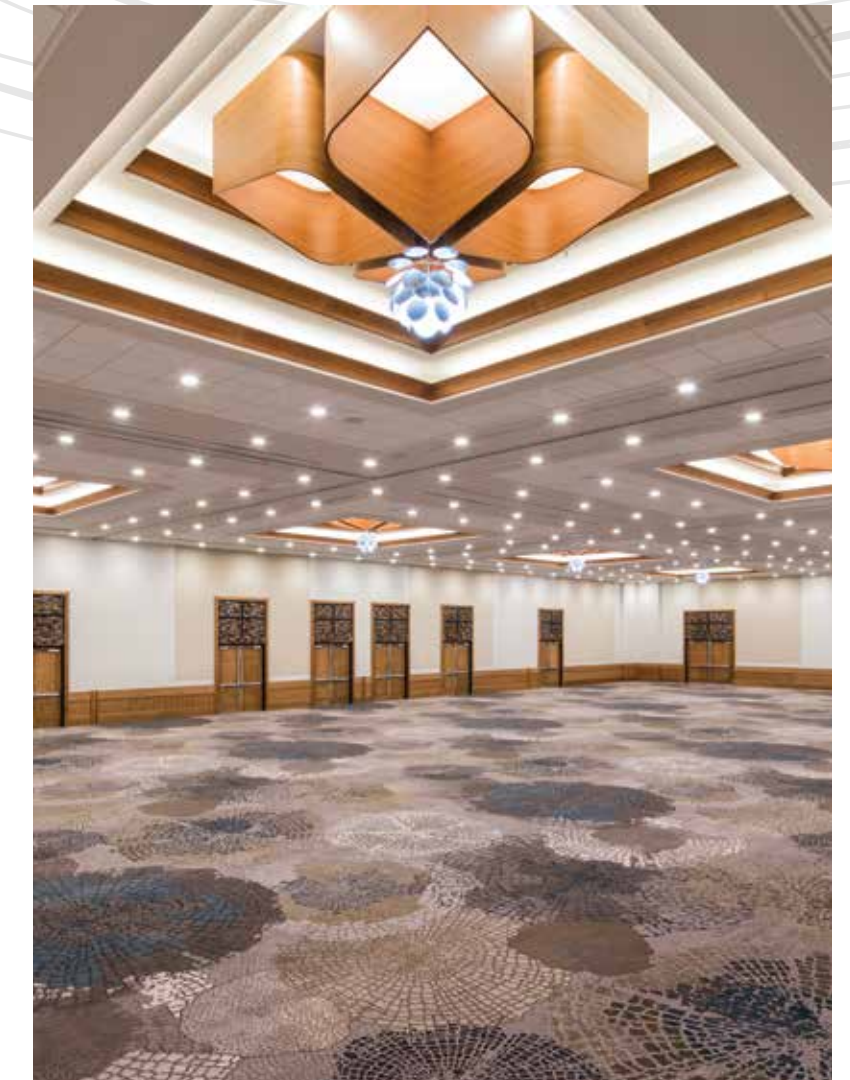

1. Our Mission

Lighting up the world with you, is our mission. It is our greatest pleasure to be an American Manufacturer, supporting designers like you who are beautifying the world. From luxury hospitality, to multi-family, to health-care settings, we can't wait to be your partner in lighting up the world.

2. Why Go Custom

Peter York said "Chandeliers are marvels of drop-dead showiness, the jewelry of architecture." Whether understated and minimalist or bold and expressive, a space's lighting fixtures are what tie the design together.

Would you depend on designs off-the shelf, when creating ambience? We didn't think so, because neither would we. That is why we exclusively manufacture Custom Lighting for Public Spaces. Everything is always manufactured with dedication, in Los Angeles, CA. 

About Us

3. We are Your Reliable, Local Resource

If you've got a vision, and we'll take care of the rest!

For over 30 years, we've been working with clients to create indoor and outdoor Public Space Fixtures for Hotels and Resorts, Casinos and Themed Spaces, Senior Living, Student Housing and Universities, Multi-Family Buildings, Restaurants, High-End Commercial Projects and more.

In our factory, everything is done under the same roof, giving you full control.

No minimums required, lead times are short, all fixtures are UL-Listed, and prices are always competitive.

5. Getting Technical

If you're designing a space, it needs Custom Lighting. We know your client intentionally picked you, to create them a unique, innovative, and exciting property, on time and within budget. We've been supporting our clients to deliver on that promise for over 36 years...

Custom Lighting for:

Hotels and Club Houses

Casinos and Resorts

Senior Living

Multi-Family (Lobbies, Rec Rooms, Corridors)

Restaurants

Health Campuses

Themed Spaces and Parks, Experiential Installations, and more...

6. Curious about Kelvin?

Our goal is to "lighten" your load, by handling the technical, lamping and wattage details of every fixture, so you can stick to design. We've got you covered, but here are some common terms you might be curious about:

Kelvin (K): A light scale from 1,000 to 10,000, respectively from yellowish/warm through blueish/cool.

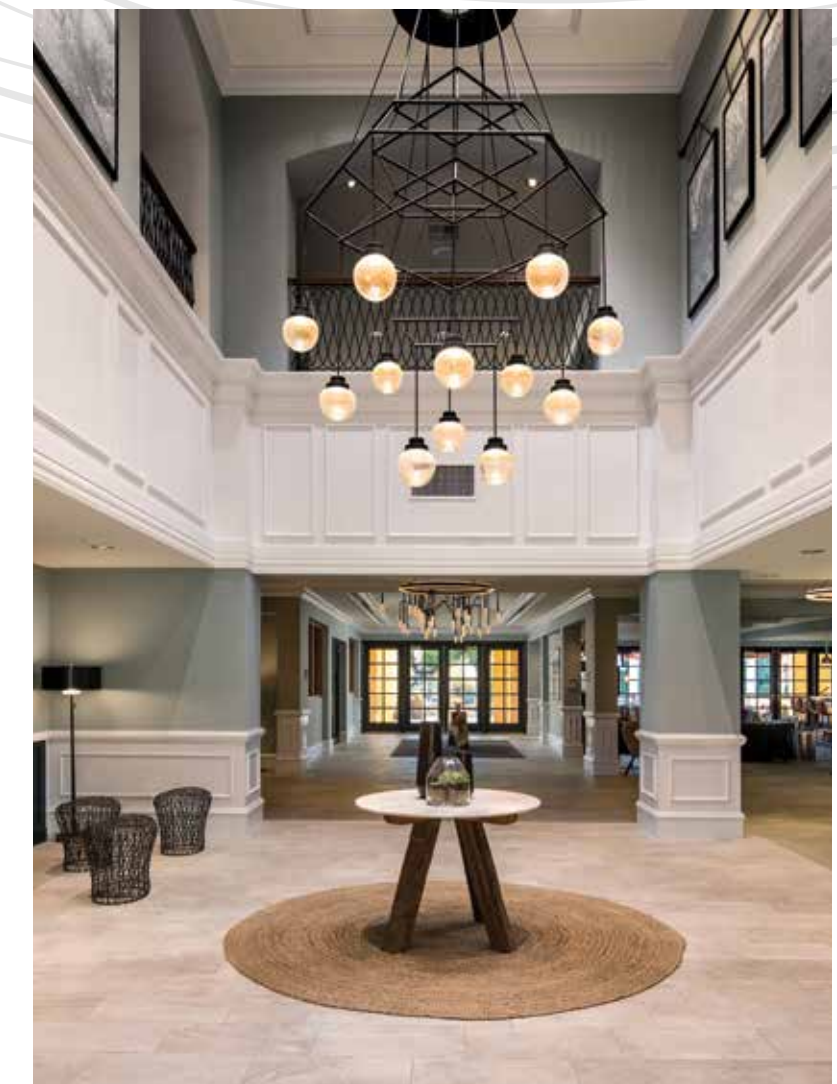

LED: Light Emitting Diode; a constantly evolving option. Popular for using lower voltage and a with longer life than traditional incandescent bulbs

LED Tape/Strip: A flexible strip with an adhesive backing, lined with small LED modules. Need a driver to function.

LED Bulb: A traditional looking bulb, using LED's efficient technology.

LED Driver: Small device providing LED tape with electricity to function. Drivers can be remote.

2700k: Most common light scale level for public space fixtures, a standard warm ambience tone.

6. Fully Custom Designing Checklist

Here is how to start imagining and creating your fully custom fixtures!

1. What's the Pendant Type (ie sconce, pendant etc)
 2. What's the Concept Type (ie candelabra, dome etc)
 3. What materials tie the room together (ie rope, seeded glass, leather wrap,)
 4. What finishes are needed (ie opal acrylic, antique gold, matte black)
- ***Great! You're more than halfway there!
5. What are the approximate dimensions, including Length, Width, Height
 6. Quantity; how many are needed to decorate the space right?
 7. Does the client have a budget in mind? If so, what?
 8. Concept Image; show us a sketch, collage, or render! Anything works.
 9. Have a blurb? Explain your vision/needs in a few words.
 10. Send it over for a quote... and we'll do the heavy lifting from there!

Flash by Laspec, Pre-Engineered Checklist

1. Browse our growing list of fixtures and choose what you love!
2. Confirm the product name, and item number
3. Choose or customize any finishes (ie black to cream, opal to marble, color match your control etc)
4. Choose if you'd like to customize materials (ie aluminum to brass, acrylic to glass etc)
5. Confirm the overall height for pendants if needed
6. Let us know about other needs (ie UL Wet, design adds, dimension changes etc)
7. Confirm quantity
8. Send it over for us to quote!

Whether you don't know where to start, or you've got a vision and are ready to jump to the next step, we're hands onto help you build, budget, and deliver your spec.

Our Engineering and Customer Service teams are here always available, with the sole mission of helping you light up the world.
